

Edge Tal App - UI Design Proposal

Color System

Swatch	Hex	Role	Where it's used
	#FFFFFF	Screen background	Default background for every screen - clean white throughout, per direction.
	#A9D0E5	Light blue - card tint	Background for cards, stat tiles, and sections that need to separate from white without a hard border.
	#4B9CB3	Teal -secondary	Secondary buttons (e.g. "Yes", "Cancel"), active/selected nav icon, links, tag pills, "Matched in [Category]" labels.
	#133046	Dark navy - primary	Every primary button and CTA, no exceptions -"Get Started," "Import," "Search," "Run Benchmark," "Add to Shortlist," etc. Also primary text/headings.
	#EFBB47	Yellow -accent	Match-confidence badges (mid-range %), highlight stats, warning-style callouts.
	#E8842E	Orange -accent	Secondary accent for badges/stats where a second warm tone is needed alongside yellow (e.g. distinguishing match-strength tiers).
	#2E9E5B	Green -status only (exception)	Reserved for "Indexed" success badges, completed checkmarks, and "runs on this device" confirmation ticks.

→ *Note: No account is required to reach or use Search. Full app access (import, search, shortlist, benchmarks) is available without signing in. Sign Up / Sign In is triggered contextually after the 3rd search, or on first tap of "+ Add to shortlist" (whichever comes first) - see Section 10a below.*

Welcome / Intro

Purpose

First screen after opening the app. Explains what EdgeTal does and leads with the privacy promise.

Elements & colors

- "Get Started" button - Primary (navy #133046)
- Skip link, top-right - Teal (#4B9CB3) text link
- Page dots - Active dot navy, inactive dots light blue

About EdgeTal -Speed

Headline

"Screen CVs in minutes"

Elements & colors

- Illustration - Uses palette: light blue, teal, navy -no photorealism
- Page dots - Active navy, inactive light blue
- "Next" / "Get Started" button - Primary (navy)
- Skip link - Teal text link

About EdgeTal -Simplicity

Headline

"One app. Minimal setup. Built to fit into your workflow"

Elements & colors

- Illustration - Uses palette: light blue, teal, navy -no photorealism
- Page dots - Active navy, inactive light blue
- "Next" / "Get Started" button - Primary (navy)
- Skip link - Teal text link

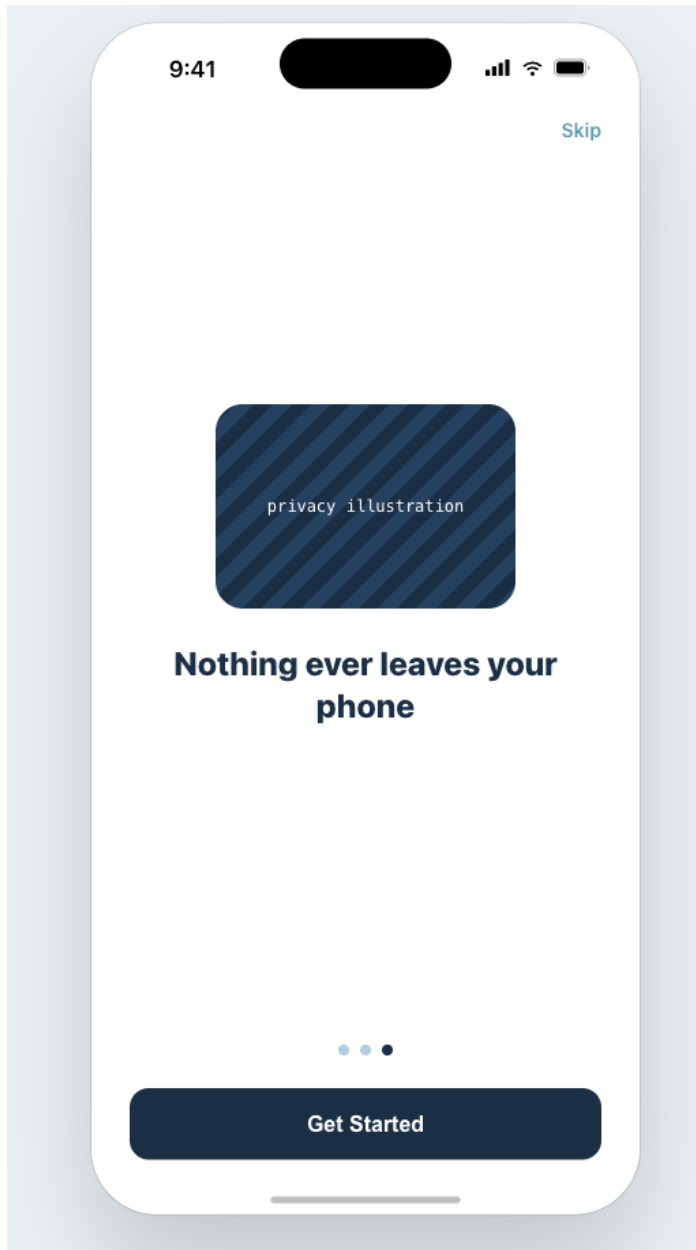

About EdgeTal -Privacy

Headline

"Nothing ever leaves your phone"

Elements & colors

- Illustration - Uses palette: light blue, teal, navy -no photorealism
- Page dots - Active navy, inactive light blue
- "Next" / "Get Started" button - Primary (navy)
- Skip link - Teal text link

Model Download

Purpose

One-time screen showing the AI model downloading directly inside the app.

Elements & colors

- Progress bar - Fill in navy, track in light blue
- Status text - Navy text on white
- Cancel/Back button - Teal (outlined)

- Continue button - Primary (navy), enabled once done

Permissions

Purpose

Requests device permissions needed for CSV import.

Elements & colors

- "Allow" button - Primary (navy)
- "Not now" / skip - Teal text link

Home / Dashboard

Purpose

Main landing screen. Entry points to the core actions.

Left corner menu

Three-dot icon (navy) opens a half-screen panel: Account, Settings, My Plan, Notifications, Sign Out.

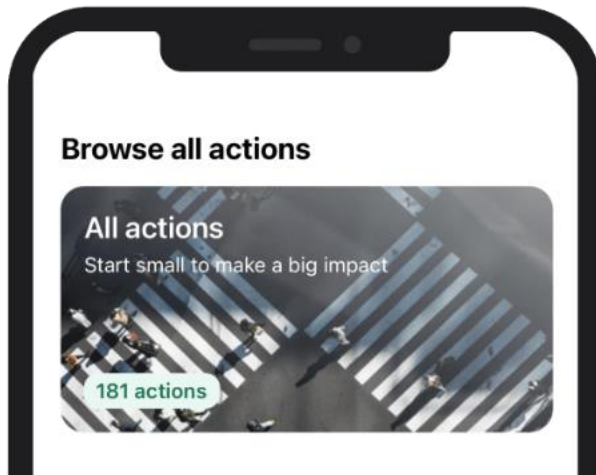

Top bar

- "Hello, Alex" greeting - Navy text
- Notification bell icon - Navy icon

Hero banner -photo-background style, matching the "Browse all actions" reference

Full-width rounded card with a background photo or illustration (subtle, muted text stays legible -a soft workspace/city or abstract candidate-network motif works), not a flat color fill. A dark navy gradient overlay sits between the photo and the text for contrast.

- Logo/wordmark, top-left - White, small
- Bold heading over the image (e.g. "Screen smarter. Stay private." - White, bold
- Stat pill, bottom-left of the card (e.g. "248 candidates ready to search") - White pill with teal text, matching the "181 actions" pill in the reference

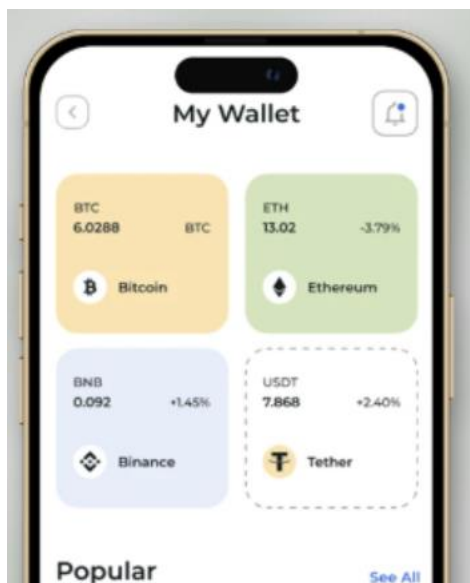

Reference: "Browse all actions" card style used for the hero banner.

Card grid (2×2) -Candidates, Last Search, Shortlisted, Benchmarks, matching the "My Wallet" reference styling

Two-row layout per card, same structure as the reference: top row shows the stat value (large, bold), bottom row shows a small icon in a rounded badge plus the label. Each of the 4 cards gets its own distinct fill so they're visually distinguishable at a glance, same as the reference's differently colored asset cards:

- Candidates card - Light-blue fill (#A9D0E5)
- Last Search card - yellow fill (#EFBB47)
- Shortlisted card - Teal fill (#4B9CB3), white text for contrast
- Benchmarks card - White fill with a dashed navy border -matching the reference's dashed-border treatment on its fourth card

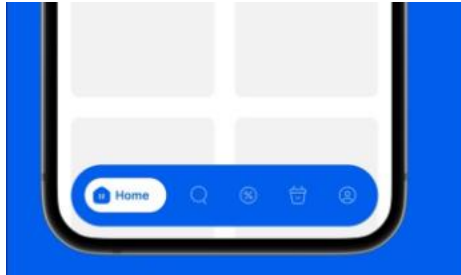

Reference: "My Wallet" 2×2 card grid style used for the stat cards.

Recent Candidates section

"Recent Candidates" header (navy), "See All" link (teal).

Bottom navigation bar

- Candidates, Search, Jobs, Models - active tab: navy pill background with white icon+label; inactive tabs: teal icon+label on white

Reference: bottom nav pill style -active tab shown as a floating pill with icon+label.

Bottom nav corrected to match the live beta and the Feature Enhancement Plan: the fourth tab is now "Jobs" (replacing the earlier "Insights"), consistent with the new Jobs screen below.

Import Resumes

Purpose

Bring candidate CVs into the app. Matches the live beta: two import methods, plus a re-index action.

Elements & colors

- "Import resumes" title + subtitle ("CSV stays on this device -nothing is uploaded") - Navy title, gray-navy subtitle
- "From URL" / "Local file" tab toggle - Selected tab: navy fill, white text. Unselected: light-blue outline, navy text
- URL input field - White field, light-blue border
- "Import from URL" button - Primary (navy)
- "Generate embeddings" button (re-index section) - Secondary (teal, outlined)
- Supported formats list - Navy text on white/light-blue card
- "Files are parsed locally" note with lock icon - Green (status-only exception, see color note above)

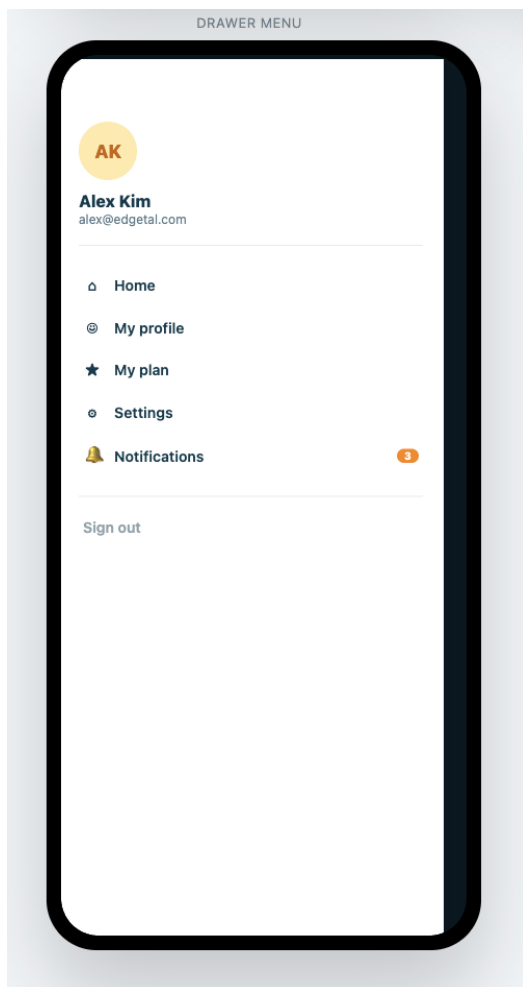

8b. Drawer Menu

Purpose

Full-screen slide-out panel, opened from the three-dot icon on Home. Shows the signed-in user and account-level navigation.

Elements & colors

- User avatar (initials) - Yellow fill (#EFBB47), navy initials text — same rotating-avatar treatment as Candidates list
- Name - Navy, bold
- Email - Gray-navy, small
- Divider line - Light blue (#A9D0E5)
- Menu items (Home, My profile, My plan, Settings, Notifications) - Navy icon + navy text
- Notifications unread-count badge - orange fill (#E8842E), white number
- Divider line above Sign out - Light blue
- "Sign out" - Gray-navy text, deliberately muted/de-emphasized vs. the other items

Candidates (Library)

Purpose

Full list of the private, on-device talent pool. Matches live beta layout.

Elements & colors

- "Candidates" title + subtitle ("Your private talent pool -stored only on this device") - Navy title, gray-navy subtitle
- "+ Import" button - Primary (navy)
- Stat tiles: Candidates / Indexed / Vectors - Light-blue card background, navy icon + numbers
- "Filter by name, skill or role" search bar - White field, light-blue border, navy placeholder text
- Candidate cards: avatar initials - Rotate through teal / yellow / orange / navy backgrounds per candidate for quick visual distinction
- "Indexed" badge per card - Green (status-only exception)
- Skill tag pills - Light-blue background, navy text
- Delete (trash) icon per card - Teal outline icon
- Search (with AI assist, match explanation, shortlist quick-add)

One combined screen -Search input, buttons, and results together, matching the live beta. Folds in three Feature Enhancement Plan items: match explanation, per-candidate feedback, and shortlist quick-add.

Purpose

Describe who you need in plain language, run a semantic search, review matches a plain-language explanation for each, and act on results without leaving the screen.

Header

"Semantic search" title (navy), subtitle (gray-navy).

Search input

White field, light-blue border, navy typed text, clear (×) icon in teal.

Action buttons

- "Search" button - Primary (navy)
- "AI assist" button - Secondary (teal outline)

Empty state (before first search)

- Privacy note ("Every search runs on this device...") with shield icon - Green (status-only exception)
- "Try a search" suggestion chips - Light-blue background, navy text, teal arrow icon

Results stats bar

- Match count - Navy text

- On-device speed stat (e.g. "25ms on-device") - Teal text, right-aligned
- AI-refined query text (shown only after AI assist is used) - Light-blue background strip, navy text

Result cards

- Candidate name - Navy, bold
- Match % badge - yellow background for mid-confidence matches orange for the strongest match in the list -gives an at-a-glance ranking without a third color
- "Matched in [Category]" tag - Teal background, white text
- One-line summary - Gray-navy text
- "Why this match" expandable section - Light-blue card, navy heading, navy bullet text - collapsed by default, tap to expand
- "+ Add to shortlist" quick action - Teal outline button, top-right of card
- Per-candidate feedback flag/rating icon - Teal outline icon, separate from the bottom "Were these helpful" row

Feedback row (below results)

- "Were these helpful?" text - Navy
- "Yes" button - Secondary (teal outline)
- "Refine with AI" button - Primary (navy)

Search (with AI assist, match explanation, shortlist quick-add)

- One combined screen -Search input, buttons, and results together, matching the live beta.
- Folds in three Feature Enhancement Plan items: match explanation, per-candidate feedback, and shortlist quick-add.
- Account gate: fully usable with no account for the first 2 searches. On the 3rd search (or first "+ Add to shortlist" tap, whichever comes first), the Sign Up / Sign In modal (see 10a) appears over the results. Dismissible via "Not now."

Sign Up / Sign In (contextual, triggered from Search)

- Purpose Account entry point, no longer a linear onboarding step.

- Triggers as a modal/bottom-sheet over the Search results screen after the user's 3rd search, or on the first tap of "+ Add to shortlist" - whichever happens first.
- Does not block use of Import, Candidates, or Search before this point.
- Headline "Save your shortlists across sessions" Subtext (required - explains the ask, ties directly to the privacy promise) "This only stores your account and app settings."
- Your candidates' data never leaves this device."
- Elements & colors - "Continue" button - Primary (navy)
- Link to Sign In for returning users
- Teal text link - "Not now" / dismiss - Teal text link, top-right (dismissing returns to Search results;
- the prompt can reappear on a later trigger, e.g. next shortlist-add attempt)

Candidate Profile

Purpose

Full CV view for one candidate, with match reasoning when arriving from a search, and direct contact actions.

Header

- Avatar with initials - Background color matches the candidate's card color from the Candidates list, for visual continuity
- Name + role - Navy, bold
- Email (tappable -opens mail app) - Teal text, underlined
- Phone (tappable -opens dialer) - Teal text, underlined

Match explanation card (shown when arrived from search)

- Match % - Yellow or orange badge, same rule as Search Results
- Explanation text - Light-blue card background, navy text

Action buttons

- "Analyse fit with AI" button - Primary (navy)
- "Runs on this device" note - Green (status-only exception)
- "Add to Shortlist" button - Primary (navy)
- "Export" button - Secondary (teal outline)
- Back button - Navy icon

Content sections -Summary, Skills, Experience, Education, Certifications

- Section headers (e.g. "SKILLS") - Teal, small caps
- Skill tag pills - Light-blue background, navy text
- Body text - Navy on white/light-blue card

Purpose

Replaces the old Insights tab. Roles being hired for, tracked on device, with candidate counts by stage.

Elements & colors

- "Jobs" title + subtitle ("Roles you're hiring for -tracked on this device") - Navy title, gray-navy subtitle
- "+ New job" button - Primary (navy)
- Job cards - Card background rotates light blue / teal / navy for visual variety across open roles, per the live mockup's tiered card colors
- Status badge ("Open" / "Filled") - Open: teal badge. Filled: navy badge
- Stage counts (e.g. "3 shortlisted • 2 interviewing • 1 offer") - Small colored dot per stage - shortlisted: light blue, interviewing: yellow, offer: orange, placed: green (status-only)

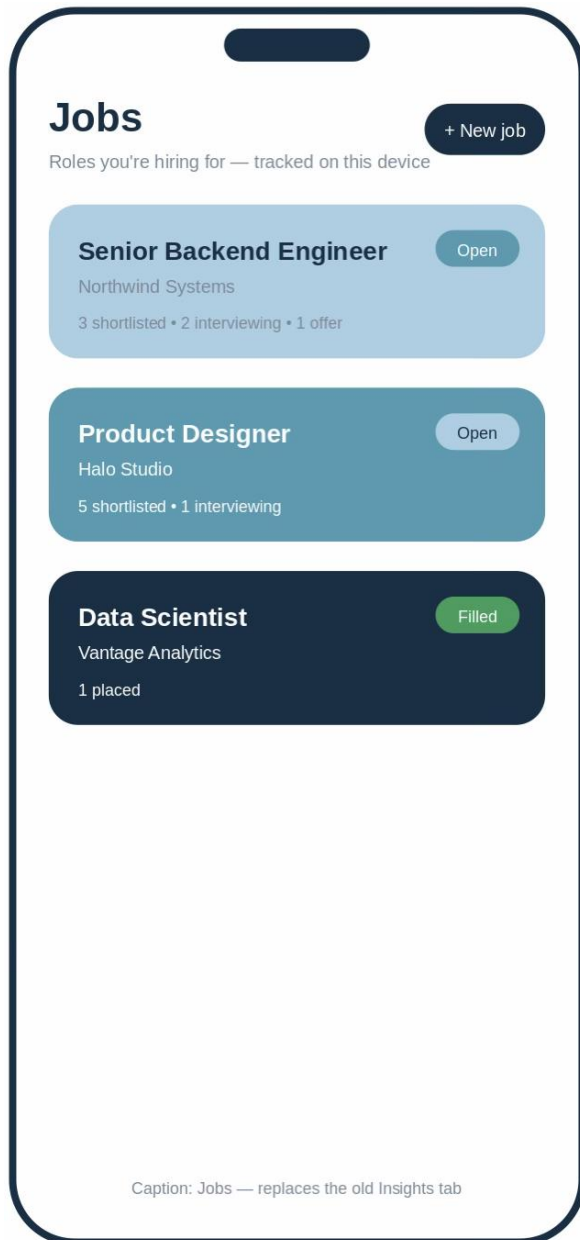

Job Detail (pipeline & stage)

Purpose

Candidates in this job pipeline. Tapping a card opens a menu to move the candidate to the next stage.

Elements & colors

- Job title header - Navy
- Candidate cards with current stage label - Light-blue card background, navy text, stage shown as a small teal tag
- Tap-to-open stage menu ("Move to Contacted / Interviewing / Offer / Placed") - Menu options in navy text, selected/current stage highlighted in teal

15. Benchmarks

Purpose

Let's the recruiter test and see EdgeTal's on-device speed, live. Matches the concrete beta mockup.

Elements & colors

- "Benchmarks" title + subtitle ("Test on-device speed yourself -no data required.") - Navy title, gray-navy subtitle
- Big stat card ("18ms -LAST SEARCH SPEED") - Teal background, white bold number and label
- "Run benchmark test" button - Primary (navy)
- Breakdown rows (Semantic search, Embedding generation, Candidate indexing) with progress bars - Row label navy, bar fill teal, bar track light blue, ms value navy

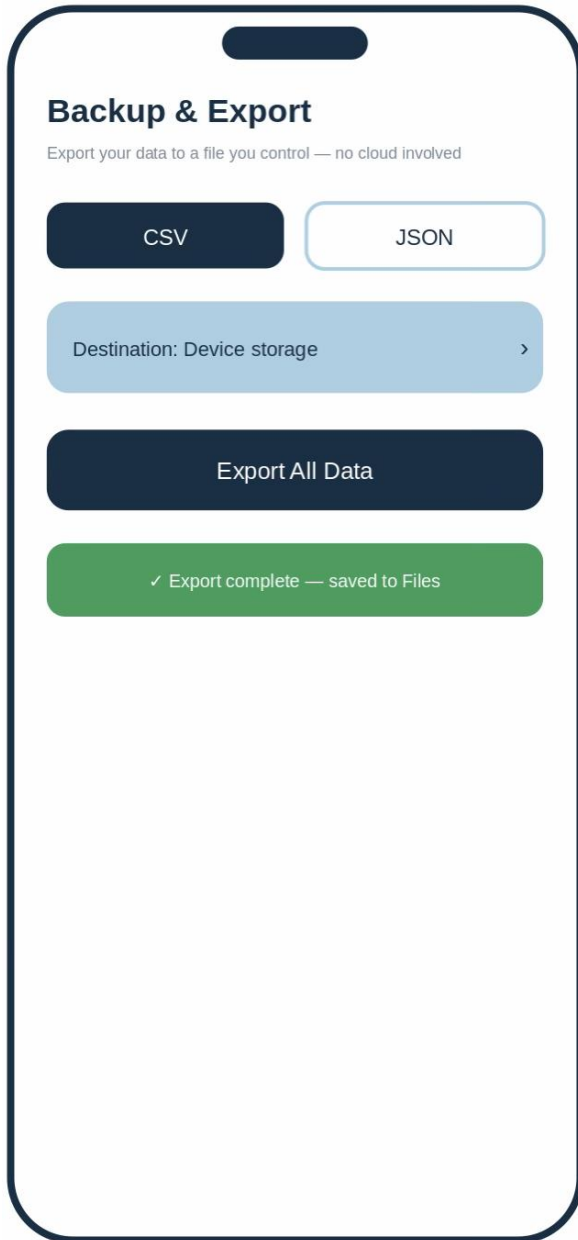

16. Backup / Export

Purpose

Export candidate data to a file the user controls -no cloud involved.

Elements & colors

- "Export All Data" button - Primary (navy)
- File format choice (CSV/JSON) - Selected option: navy fill. Unselected: light-blue outline
- Destination picker - White field, light-blue border
- Confirmation message - Green (status-only exception)

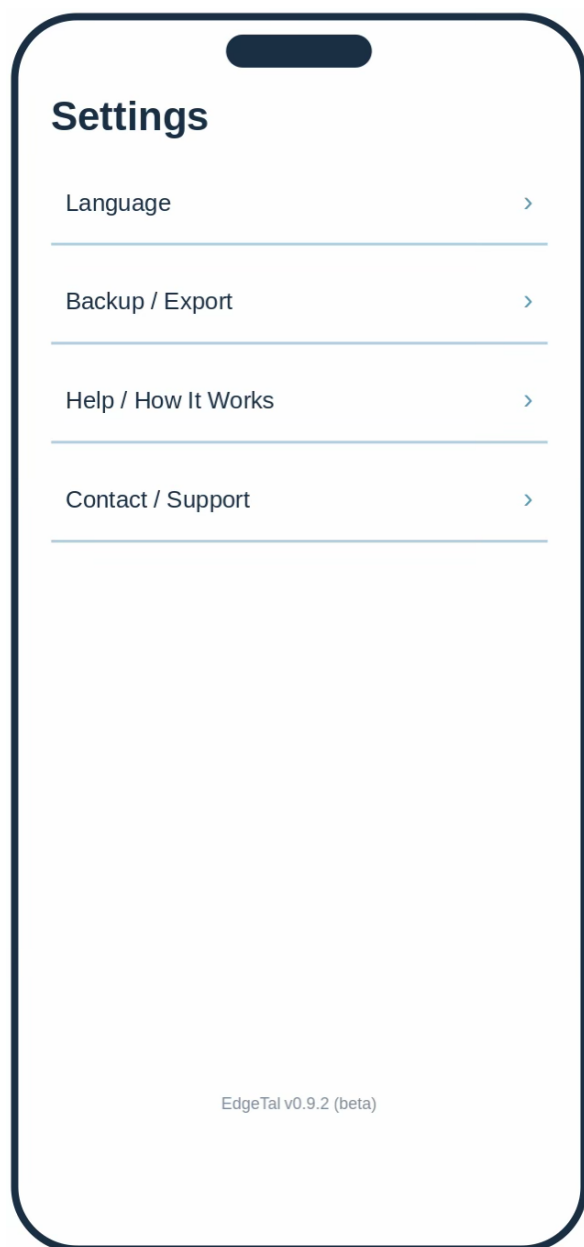

17. Settings

Purpose

App-level settings and access points to Backup/Export.

Elements & colors

- Language selector - Navy text, light-blue divider lines
- Link to Backup/Export, Help, Contact/Support - Teal text links
- App version/info - Gray-navy small text

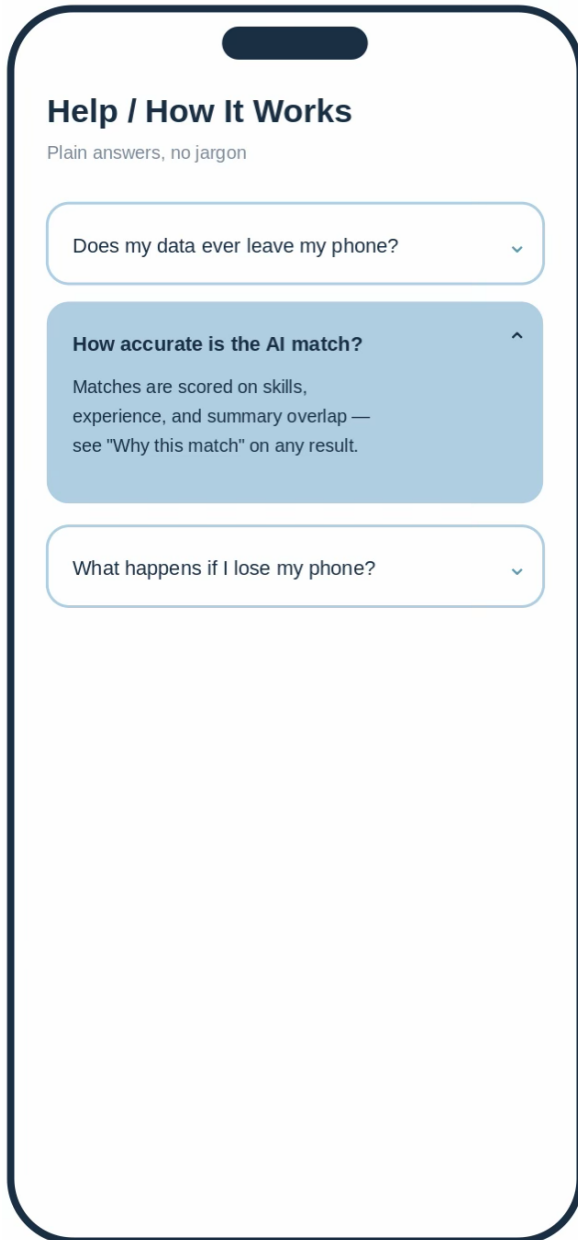

18. Help / How It Works

Purpose

Plain-language FAQ reinforcing honesty over hype.

Elements & colors

- Expandable FAQ items - Navy question text, light-blue card background when expanded
- Back button - Navy icon

19. Models

Purpose

Fourth bottom-nav tab, visible throughout the beta. Likely shows the on-device AI model status (name/version, storage size) and possibly links to re-indexing.

Elements & colors

- Model info card - Light-blue background, navy text
- Re-index / update action (if applicable) - Secondary (teal outline)
